Physics 1401 Homework Solutions - Walker, Chapter 11 3 18. (a.) The object experiences the greatest angular acceleration when the torque acts about the x axis. It experiences the least angular acceleration when the torque acts about the z axis. This follows from Newton's second law for rotational motion: $\vec{\tau} = I\vec{\alpha}$.

This is a one-semester terminal physics course, and it does not fulfill the pre-med physics requirement. Another note: PHYS 100 fulfills the Scientific World category of the Flexible Core of Pathways. It is a pre/co-requisite of the lab-including course PHYS 101, of the Life and Physical Sciences category (but you

may take 100 without taking 101).
