Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

Language immersion, or simply immersion, is a technique used in bilingual language education in which two languages are used for instruction in a variety of topics, including math, science, or social studies. The languages used for instruction are referred to as the L1 and the L2 for each student, with L1 being the native language of the student and L2 being the second language to be acquired ...

Advocates for Youth champions efforts that help young people make informed and responsible decisions about their reproductive and sexual health. Advocates believes it can best serve the field by boldly advocating for a more positive and realistic approach to adolescent sexual health. Advocates focuses its work on young people ages 14-25 in the U.S. and around the globe.

Strategies Guided by Best Practice for Community Mobilization

A study suggests that around 1 billion years ago photosynthetic primary producers were likely too small to support the development of animal ecosystems, and lack of large primary producers in the mid-Proterozoic oceans, along with low oxygen levels, may have hampered animal life.

There is worldwide concern over false news and the possibility that it can influence political, economic, and social well-being. To understand how false news spreads, Vosoughi et al. used a data set of rumor cascades on Twitter from 2006 to 2017. About 126,000 rumors were spread by âˆ¼3 million people. False news reached more people than the truth; the top 1% of false news cascades diffused to ...
