The Second Edition of Applied Optimization with MATLAB® Programming enables readers to harness all the features of MATLAB® to solve optimization problems using a variety of linear and nonlinear design optimization techniques.

Applied Optimization with MATLAB Programming, 2nd Edition

The nonlinear programming problems contain decision variables, an objective function, and usually some constraints. The chapter looks at problems that have no constraints, so that the author focuses on the nature of a nonlinear objective function and its implications for the use of the nonlinear solver.
