During the mid-20th century, the philosopher Karl Popper emphasized the criterion of falsifiability to distinguish science from nonscience. Statements, hypotheses, or theories have falsifiability or refutability if there is the inherent possibility that they can be proven false. That is, if it is possible to conceive of an observation or an argument which negates them.

Pseudoscience - Wikipedia

The California Department of Education provides leadership, assistance, oversight and resources so that every Californian has access to an education that meets world-class standards.
